December 20, 1978

Mr Paul McKinney  
Rural Route #8  
Box 48  
Decatur, Illinois 62522

Dear Mr McKinney

Your solid waste disposal facility located west of Decatur was inspected on December 12, 1978, by Mark Hutson and Gary Steele, representing this Agency

The inspection disclosed the following condition(s) which constitute violations of the Environmental Protection Act and Chapter 7 of the Illinois Pollution Control Board Solid Waste Rules and Regulations

An inadequate depth of daily cover was observed in an area located on the slopes around your active dumping area

Solid Waste was being deposited at the top of the slope Solid waste should be deposited into the toe of the fill or into the bottom of the trench unless otherwise indicated in your permit

Large amounts of wind-blown litter were observed in and around the site All litter shall be collected from the sanitary landfill site by the end of each working day and either placed in the fill and compacted and covered that day, or stored in a covered container It is suggested that arrangements be made to provide portable fencing on the leeward side of your unloading site to trap wind-blown litter Routine policing should also be provided for the site and surrounding area Under severe conditions, it may be necessary to cover the solid waste at frequent intervals during the day

We suggest that you correct the aforementioned violations A reinspection will be made in the near future to determine your progress

Sincerely,

Monte M Nienkerk, Central Region Manager
